## Key Features

### Global Leader.

KeyCarbon is the global leader in USB devices to record human/PC interaction.

128b

### High data security.

The keystrokes stored in the internal on-board flash chip are encoded with up to 128-bit encryption. This ensures that your data is protected with military strength encryption.

5 sec

### Easy to install.

KeyCarbon devices can be installed in seconds.

\$/u

### Price to performance ratio.

KeyCarbon devices use top quality components. Each device contains more processing power than a high end PDA.

Inc.  
500

### Widely accepted.

KeyCarbon products are in use in many Fortune 500 companies, and government and military installations worldwide.

FC
